

# AKASH NAUHWAR

## Senior Cloud & Data Engineer

+91 7977784949 | [akash.nauhwar@outlook.com](mailto:akash.nauhwar@outlook.com) | [Pune, India](#)  
[linkedin.com/in/akash-nauhwar](#) | [github.com/anauhwar](#) | [Portfolio](#)

## PROFESSIONAL SUMMARY

Senior Cloud & Data Engineer with **9+ years of experience** designing, building, and optimizing large-scale, cloud-native data platforms. Specialized in **Microsoft Azure, Databricks, Azure Data Factory, Azure Synapse, and Snowflake**, with strong expertise in end-to-end data engineering, platform monitoring, cost optimization, and automation. Proven ability to lead teams, collaborate with global stakeholders, and deliver scalable, secure, and high-performance cloud data solutions. Certified across Azure, Databricks, and modern analytics platforms, with hands-on exposure to **GenAI and Agentic AI use cases**.

## CORE SKILLS

- Cloud Platforms**  
Microsoft Azure (Data Factory, Databricks, ADLS Gen2, Synapse, Event Hub, Azure Functions, APIM, Azure Data Explorer, RBAC, ARM Templates), AWS (S3, Lambda, Aurora PostgreSQL)
- Data Engineering & Analytics**  
Azure Databricks, PySpark, SQL, Snowflake, SAP HANA, Azure Data Explorer (Kusto), Apache Kafka, Apache Airflow, Power BI, **Data Mesh Architecture, Medallion Architecture (Bronze/Silver/Gold)**
- Programming & Frameworks**  
Python, SQL, PySpark, FastAPI, Flask, REST APIs, GraphQL
- DevOps & Automation**  
Azure DevOps, GitHub, CI/CD Pipelines, ARM Templates, **Bicep**, Infrastructure as Code (IaC), Postman
- AI / Advanced Analytics**  
Generative AI, Agentic AI, NLP (TF-IDF, LDA), Machine Learning Pipelines, Time-Series Forecasting
- Leadership & Delivery**  
Team Leadership, Client Engagement, Agile/Scrum, Stakeholder Management, Solution Architecture

## PROFESSIONAL EXPERIENCE

**Tata Consultancy Services (TCS) | Senior Data Engineer / Cloud Engineer | Feb 2017 – Present**

### Key Responsibilities & Achievements

- Led and managed a **Data Provisioning team**, delivering enterprise-scale cloud data solutions aligned with business and compliance requirements.
- Designed and implemented **end-to-end ETL/ELT pipelines** using **Azure Data Factory and Azure Databricks**, supporting high-volume, high-velocity data ingestion and transformation.
- Integrated **SAP HANA** and other enterprise systems into **Azure Synapse and ADLS**, ensuring data accuracy, reliability, and governance.
- Automated data workflows using **PySpark**, reducing manual intervention and improving pipeline reliability and scalability.
- Implemented **Infrastructure as Code (ARM templates, PowerShell)** to enable repeatable, secure, and scalable Azure deployments.
- Optimized pipeline performance and cloud costs through tuning, monitoring, and efficient resource utilization, reducing failures and downtime.
- Implemented **data governance, RBAC, and service principals**, strengthening security and access control across platforms.
- Collaborated closely with global clients and stakeholders, translating business requirements into robust technical solutions.

## KEY PROJECTS

**ADX Centralized Monitoring Platform (DL1H) | Aug 2025 – Present | Role: Senior Data Engineer**

- Architected a **centralized observability and monitoring platform** using **Azure Data Explorer (ADX)** to track jobs, costs, and resource utilization across Azure services, Databricks, and Snowflake.
- Ingested **Azure Monitor and Diagnostic Logs** via **Event Hub** into ADX, enabling near real-time telemetry and operational analytics.
- Implemented **ADX Update Policies** to transform and enrich streaming data at ingestion time, improving query performance and reducing downstream processing.
- Built ingestion pipelines using **Kusto connectors and plugins**, consolidating telemetry from multiple cloud platforms.
- Developed interactive dashboards using **Grafana and Plotly**, enabling stakeholders to analyze cost trends, workload performance, and domain-wise resource usage.
- Enabled proactive alerting, governance, and **FinOps-driven cost optimization** through unified visibility across platforms.

**Data One Lakehouse (D1LH) | Sep 2023 – Jul 2025 | Role: Senior Data Engineer**

- Led a cross-functional team delivering a **modern Azure-based lakehouse architecture**.
- Developed and optimized Databricks jobs, views, and snapshots to support large-scale analytics workloads.
- Built resilient ingestion pipelines from **SAP HANA to Azure Data Factory**, implementing validation, logging, and error-handling mechanisms.
- Integrated Azure Functions, APIM, and Storage services to enhance orchestration and monitoring.
- Achieved improved query performance, reduced processing times, and increased platform stability.

**Foresight – AI Forecasting Platform (Consumer Health) | Jan 2023 – Aug 2023 | Role: Data Engineer**

- Built an **AI-powered demand forecasting solution** improving sales prediction accuracy for enterprise stakeholders.
- Migrated legacy R/Jupyter-based workflows to **Azure Databricks**, reducing processing time by **~15%** and improving scalability.
- Implemented feature engineering and time-series transformations to enhance ML model accuracy. - Automated end-to-end pipelines, saving **20+ hours/month** of manual effort.

**AIA Marketing Intelligence Tool (Pharma) | Feb 2022 – Dec 2022 | Role: Data Engineer**

- Developed a data-driven **market intelligence and stakeholder mapping platform**, increasing engagement by **~20%**.
- Built centralized BI pipelines integrating structured and unstructured data sources.
- Implemented NLP-based content retrieval using **TF-IDF and LDA**, improving insight relevance by **~40%**.
- Optimized backend services using **AWS Aurora PostgreSQL and Python APIs**, improving query performance by **~20%**.

**Automated Scouting Tool (Consumer Health) | Jul 2021 – Jan 2022 | Role: Data Engineer**

- Designed a cloud-native application for automated data scouting across healthcare datasets.
- Built AI-powered cognitive search and personalized dashboards using NLP and ML techniques.
- Developed REST APIs using **FastAPI and Flask**, improving response times by **~30%**.

---

**CERTIFICATIONS**

- Databricks Certified Data Engineer – Professional (Jul 2025)
- Databricks Certified Generative AI Engineer – Associate (Jul 2025)
- Databricks Certified Data Engineer – Associate (Jun 2025)
- Microsoft Certified: Azure Data Engineer Associate (Jan 2025)
- Microsoft Certified: Fabric Analytics Engineer Associate (Dec 2024)
- Microsoft Certified: Azure Administrator Associate (Jul 2023)
- Microsoft Certified: Azure Fundamentals (Apr 2023)
- Microsoft Certified: Power BI Data Analyst Associate (Aug 2021)
- Lean Six Sigma Green Belt (ASCB-USA)
- Scrum Fundamental Certified (SCRUMstudy)

---

**EDUCATION**

**Master of Business Administration (Business Analytics) | 2019 – 2021**  
AIMS – Unique Institute of Management, Pune | **80.6%**

**Post Graduate Program – Banking & Financial Services | 2019 – 2021**  
AIMS Institute of Management Studies, Pune | **80.2%**

**Bachelor of Information Technology | 2013 – 2016**  
Pillai College of Arts, Commerce & Science | **77.3%**

---

**ADDITIONAL ACHIEVEMENTS**

- Contextual Master Award & On-the-Spot Award for exceptional project contributions at TCS.
  - Club Service Director, Rotaract Club of AIMS (RID 3131).
  - NCC ‘C’ Certificate (Ministry of Defence, Govt. of India).
-
